Tutorial 1
Workspace and Filters

Opening photos

Camera Raw Menu

How the workspace is set up

Resetting the workspace

Window-Check Palettes

Help, tool information, icon information

Navigating and zooming

Cropping and rotating

Filter Menu

History Palette

Saving

Tutorial 1 Practice

Open three of your own photos in Photoshop.

Crop and rotate the photos if necessary.

While exploring what is available the Filter Menu, add multiple edits to each photo.

Tutorial 2
Image-Adjustments

Why is it important to edit photos?
Value Range
Colors

Tutorial 2 Practice

Open three of your own photos in Photoshop.

While exploring the Image-Adjustments Menu, add multiple edits to each photo.

Tutorial 3
Selection Tools

Marquee Tools
Lasso Tools
Magic Tools
Tolerance
Select by Color Range
Select by Focus Area
Deselect/Inverse Functions
Adding/Subtracting from Selections
Saving Selection/ Load Selection

Tutorial 3 Practice

Open three of your own photos in Photoshop.

Use Selection Tools to select and change parts of the photos by applying either options in the Filter Menu or the Image-Adjustment Menu.

Tutorial 4
Difficult Selections

Workflow
Select-Modify-Feather
Select and Mask Menu

Tutorial 4 Practice

Open three of your own photos in Photoshop with subjects you think would be difficult to select. Think of things like trees or someone's hair.

Use the Select-Modify-Feather or the Selection and Mask Menu to select and change parts of the photos by applying either options in the Filter Menu or the Image-Adjustment Menu.

Tutorial 5
Layers- Parts of Photos

Review Selection Tools

Select-Modify-Feather

Move Tool

Transform Controls and the Edit-Transform Menus

Layers Palette

Blending Combined Photos using Image-Adjustments

Edit-Copy, Edit-Paste

Image-Image Size Menu

Saving with Layers- .psd

Tutorial 5 Practice

Open two of your own photos in Photoshop that you want to combine.

Combine the photos by cutting something out of one image and putting it into another image.

Try this again with another set of photos.

Tutorial 6
Layers- Whole Photos

Move Tool and Transformation Controls
Opacity
Layer Blending Menu
Layer Order
Eraser Tools
Merging Layers
Review Saving with Layers

Tutorial 6 Practice

Open two or more of your own photos in Photoshop that you want to combine.

Combine the photos by overlapping the whole photos and blending them together using transparency, Layer Blending Modes and Image-Adjustments.

Try this again with another set of photos.

Tutorial 7
Removing Stuff

Clone Stamp Tool

Edit- Content-Aware Fill Menu

Tutorial 7 Practice

Open two of your own photos in Photoshop.

Remove something significant from each photo so well that you can't tell it was there.

If your edits don't blend well or look believable the first time, you might consider trying several times on the same photo until you problem-solve how to blend the edits.

Tutorial 8
Retouch

Adjustment Layers to Preserve Original Image

Spot Healing Brush

Healing Brush

Patch Tool

Dodge Tool

Burn Tool

Sponge Tool

History Brush

Whitening Teeth

Adjustment Layers to Change Eye Color

Tutorial 8 Practice

Open a new headshot of yourself in Photoshop.

Use the Retouch Tools to "touch up" your portrait. Consider removing, blending or enhancing parts of the portrait.

New Documents
